Stump Development Brief — Intake

Scenario Analysis & Development Capacity · Santa Cruz County

This intake collects the information needed to produce a Stump Development Brief — a four-scenario analysis of what a property could become. Sections 1–2 identify the property and your role; sections 3–5 shape which scenarios are modeled and how. Completion time: 25–35 minutes. If you've previously commissioned a Stump Report for this property, reference the Report ID in Section 1 and we'll carry forward the parcel characterization data.

SECTION 05

Scenarios to Emphasize

The Brief always models four scenarios — Hold & Optimize, Value-Add Renovation, Multiply (ADU/subdivision), and Redevelopment. This section lets you indicate which scenarios are most relevant to your situation, which receive deeper analysis, and which can be summarized more briefly.

SCENARIOS OF HIGHEST INTEREST (CHECK ALL THAT APPLY)

- ☐ Hold & Optimize (light improvements, operational optimization)
- ☐ Value-Add Renovation (major rehab of existing structure)
- ☐ ADU Addition (detached ADU, attached ADU, or JADU)
- ☐ Subdivision / Lot Split (SB-9 or other)
- ☐ Full Redevelopment (demolish and build new)
- ☐ All four, equal weight

SCENARIOS TO EXCLUDE (CHECK IF NOT APPLICABLE)

- ☐ Do not model Hold & Optimize
- ☐ Do not model Value-Add Renovation
- ☐ Do not model ADU / Subdivision
- ☐ Do not model Full Redevelopment
- ☐ No exclusions
